

**Featured Jasper Fire School Class**

# Fire Behavior & Thermal Imaging

*This session trains your firefighters in recognizing rapid fire and smoke behavior events such as flashover, backdrafts & smoke explosions in an interactive setting. The morning session begins with a brief lecture and ends with interactive live fire training utilizing the **Max Fire Box**. Members of your fire department will be given the opportunity to witness over 40 key fire behavior definitions in a controlled interactive learning environment. The afternoon session begins with live online lecture with **Andy Starnes**. The tactical 360, Go/No-Go decision making model and protecting your crew from thermal insult are just a few of objectives cover during this lecture. Upon completion of the classroom session firefighters will use thermal imaging cameras in an interactive learning environment utilizing the **Max Fire Box**.*
